

Alien-UFO-USO Global Disclosure Political Activism Tool

UFO (Unidentified Flying Object) USO (Unidentified Submerged Object)

Logical and rational minds are confronting overwhelming evidence that UFO-USO activities are real. Now is time to manifest personal strength to expose the truth and then to find pathways to positively evolve as it is revealed.

[Selected UFO files declassified by the government of the United Kingdom](#)

Are alien entities and extra-terrestrial crafts visiting our planet? The answer must be either Yes or No.

Volumes of highly credible, eyewitness reports of unidentified crafts of exceptional maneuverability span every continent and every ocean for at least 50 years.

If you believe alien entities and extraterrestrial crafts are visiting our planet, then contemplate that each alien entity is either friendly or unfriendly to the human race.

(1) If you believe alien entities are friendly to humanity, then you must conclude that you are denied peaceful and cooperative interactions with those friendly alien species.

(2) If you believe alien entities are unfriendly to humanity, then you must conclude that you are denied vital knowledge to prepare personal defense contingencies and contributions to global strategy.

If you do not believe alien entities and extraterrestrial crafts are visiting our planet, then you must conclude that the unidentified objects are man-made.

(3) Despite overwhelming evidence, if you still believe that earth is not being visited by aliens and extraterrestrial crafts, then you must conclude that the unidentified objects reported are made and controlled by man. Accordingly, you must conclude that you are denied the benefits from those human technologies that would immediately end every perceived global energy crisis, mass transit obstacle and personalized transportation need - avoidable human suffering from the failure to share advanced technologies.

If you believe that not one alien-UFO-USO eyewitness report accurately depicts the truth, then you believe that there must be delusions among independent minds experiencing the same phenomena.

Furthermore, these detailed delusions would have been successfully repeated on a global scale over decades of time. Such a hypothesis disrespects trusted and honorable men and women of varying professions and echelons of society, among who are respected officials whose professional advice and testimonies were sought and valued during many years of faithful military or government service.

Global Disclosure and Transparent Discussions:

Independent of which hypothesis you choose to believe regarding the Alien-UFO-USO phenomena, you must logically conclude that you have been and continue to be denied information vital to your personal, national and global existence and advancement - potentially for future generations to come.

While sincere, global discussions and accountability would reveal truths, topic avoidance or sluggish and deceptive responses also provide valuable information. Although some governments have declassified some UFO files, some are still holding back perhaps for reasons such as technology superiority, concerns of global panic or other covert agendas. Global citizens must understand that there are entities that expend enormous effort just to conceal these truths.

Failure to reveal all documents along with transparent, public, cooperative discussions by briefed government entities constitutes and sustains competitive psyche between covert entities and the public they serve. Unresponsiveness and failing to confirm Alien-UFO-USO existence and knowledge are deemed as major obstacles to the will and advancement of the people. Covert Alien-UFO-USO operations have the potential to subordinate every other government policy. One possible scenario could include financial policies that appear illogical and unjustified by rational thinkers, only to divert extensive resources to fund Alien-UFO-USO operations.

Inform yourself regarding all forces that influence personal, local, national and global security policy.

Activism:

(1) Challenge yourself to find an alternate scenario not listed above. Convince yourself, given only the mere existence of these unidentified crafts within the earth atmosphere, that there are no other logical scenarios to consider. Then conclude that the pursuit of global Alien-UFO-USO disclosure must not be delayed.

(2) Vote only for political or government representatives that strongly advocate global Alien-UFO-USO disclosure and transparent government revelations among all nations as a top agenda. Then, hold them accountable for their commitments.

(3) Mail, fax, email or otherwise deliver a copy of this analysis and activism agenda to your government representatives with any required personal identifying information and comments to express your commitment to full global Alien-UFO-USO disclosure.
